Strategic Global Leadership | GCC/Delivery/Engineering Leader | Scaled Teams 0→450+ | Cost, Revenue & P&L | AI driven business Transformation | IIM, Agile, PMP |

Impact Made

- | | | |
|---|--|--|
| ❖ 26+ Years Transforming & leading delivery | ❖ 18% Faster delivery using AI at Clarion | ❖ 25+ Legacy apps rewritten cloud-native |
| ❖ 450+ Largest team scaled & led | ❖ 98% Customer satisfaction sustained | ❖ 7%+ margin improved at Clarion |
| ❖ 3 GCCs established from scratch | ❖ <5% Attrition held, year on year-16 years | ❖ \$80M revenue managed at Nuance |
| ❖ Built AI Native SAAS based Products | ❖ 83+ Applications transitioned at Jet2 | ❖ \$30M Largest single account owned |
| ❖ 10+ AI based tools productionized | ❖ 9+ Data-science models live, \$5M+ margins | ❖ \$15M+ Revenue book at Clarion |
| ❖ 40% + time saved – data migration | ❖ 3+ M&As -led end to end at Netrix | ❖ \$5M+ Margins added via data science |

Summary

- ❖ 26+ years of experience building and scaling global Engineering/Delivery organizations. led teams to surpass the Product, Engineering, Delivery, Business, Operations and Customer KPIs by strategically leveraging my Business and Technology acumen, Industry best practices, Process improvements, People Capabilities, Performance driven work culture, Continuous improvement initiatives, and Driving innovation on a consistent basis
- ❖ Proven ability to manage stakeholder expectations, build strong relationships, and collaborate effectively with cross-functional teams, including onshore and offshore stakeholders. Build trust across cultures and time zones.
- ❖ Adept in managing end-to-end lifecycle of SAAS based enterprise-scale products and Software Applications deployed on-premises and in cloud infra using PMP/ITIL/Agile methodologies within project timelines and budgets
- ❖ Hands on into end-to-end Product Engineering/Delivery lifecycle, involved in product ideation, roadmap prioritization, collaborating with Product and BA teams, formulating the delivery plans, overseeing delivery and executing projects within the project budget and timelines using Scrum
- ❖ Built Data Engineering and Data Science teams from ground up, delivered 9+ML models creating >£5 million additional revenue, introduced AI across SDLC to improve the speed and quality, led the Gen AI based Smart Search capabilities in the E-commerce platform at Jet2, leading MCP based integration at Onit, part of AI Governance team which is working on many AI native product initiatives including SLM based product called Olava at Onit
- ❖ Building AI first culture – Hands on experience with Claude Code, Claude Co-Work, n8n, Cursor, using AI across the SDLC, AI based estimation tool, Agentic AI based end to end Agile management, AI-powered data migration, delivery dashboards, AI-assisted TDD and clean coding, documentation-as-we-build, MCP-based metadata-driven integration, an AI PM agent, and AI-based data mapping and migration tools.
- ❖ Built AI-powered data migration and build tools that cut the end-to-end process from 6 months to 3 weeks, plus MCP-based metadata-driven integration, AI-assisted TDD and clean coding, AI based QA automation, documentation as we build using AI, helping improve customer experience
- ❖ Managed accounts with revenue up to \$30M, an \$80M revenue portfolio and a £4.4M GCC budget; delivered \$450K in cost savings during FY19 and oversaw a subcontractor partner worth \$750K in annual billing
- ❖ Scaled the team from 67 to 450+ within 30 months, hired 10+ senior leaders, transitioned over 100+ Application within 1 year, transformed the teams into fully agile based teams, built and grew new teams (L&D, Data Engineering, Data Science and ML-Ops, Digital Analytics, RPA, etc.) from scratch while leading the e-commerce and mobile platform modernization and business application releases.
- ❖ Joined Nuance as the first employee in India to build and lead a 120+ people professional services organization working on design, development, testing, implementation, enhancements, and support to voice (AI/ML) based conversational AI, virtual assistance (voice-enabled apps) deployed in Azure-based cloud for enterprise customers.
- ❖ Customer Excellence – QA Sign Off Process, UAT Process, Agile Adoption, AI Powered Estimations, AI powered Documentation, AI based QA test case creation, TDD delivery, new Resourcing Process, etc.
- ❖ Operational excellence – Resourcing process, hiring strategies, cost optimization, delivery dashboards, automation, managing budgets, Employee sat, L&D, adopting Industry best practices and processes, onboarded various vendors, working on NDAs, MSAs, ARs, etc.
- ❖ Known for building Performance driven yet Employee centric transparent work culture driven by “One Team” ethos, helped me with attracting and retaining talent, groomed leaders within the organization and helped maintain the attrition rate below 5% at all the times

- ❖ I am pursuing AI for leaders from IIM-V, SMP from IIM-K, MBA from Symbiosis, PMP, ITIL-SO, Scrum, CCNA, SCCA, ACE certified, and have exposure to most of the latest technologies and methodologies

Career Journey

Onit – Pune (Jan’26 - Present) – Director – Professional Services

- ❖ Onit is in to AI Native SAAS based Legal management software product suite used by top 10 to SMB customers across the globe
- ❖ Leading a team of Implementation, Migration, Integration and QA working on end of end customization, deployment and support
- ❖ Heading the entire CX Organization for the company
- ❖ Built and productionized Agentic AI based Agile PM app using Curser, n8n, JIRA and LLM capabilities saving immense efforts and time
- ❖ Building AI first culture by taking initiatives – AI based QA Automation, AI powered Agile, AI enabled estimation, Documentation as we build using AI, MCP based metadata driven Integration, AI PM Agent, AI based tools for Data Mapping and Migration, etc.
- ❖ Took multiple initiatives to transform the delivery to improve customer experience and business KPIs
- ❖ Introduced end to end QA processes, AI enabled requirement to sprint planning
- ❖ Centralized Staffing process – Projects are planned better and Utilization is managed better
- ❖ Clean UAT – Ensure there are no or minimal issues in production/during warranty

Clarion Technologies– Pune (Jan’25 – Jan’26)- Global Delivery Head

- ❖ Leading a team of 300+ developers working on over 100 projects using the latest technologies (Web Dev, Mobile App dev, Data Engineering, Data Science, AI/ML, etc.) and best practices such as agile processes.
- ❖ Responsible for \$15M+ Revenue Portfolio at Clarion and 100+ customers spread over America, Europe and Saudi region
- ❖ Improved 5%+ Profitability within 6 months of joining by taking various revenue improvements, Margin and Cost optimization measures, \$5M+ additional margins generated through data science and analytics initiatives, achieved 18%-time savings using AI-assisted delivery
- ❖ 98% Customer Satisfaction: Maintained C-Sat score of 5 with >85% coverage
- ❖ Collaborate with Marketing, Sales, HR, TA, RMG, L&D, Finance, and Legal to ensure we are taking care of all the aspects of account management, revenue, profitability, customer satisfaction, employee satisfaction, etc.
- ❖ Responsible for the end-to-end project deliveries within the budget, customer expectations and timelines
- ❖ Accountable for Revenue, P&L, Account mining, Revenue recognition, Customer satisfaction and delivery
- ❖ Took initiatives to improve the Delivery KPIs by taking outcome-driven initiatives such as delivery audits, code review, best practice adoption, tech assessment, up-skilling/cross-skilling, and improving the Ops review dashboard
- ❖ Took Initiative to reduce the management bandwidth by 28%, automate all the reports, improve the collections, reduce the overall outstanding, averted many reductions and terminations, grew most of the account headcounts from 2 to 25 developers even though Clarion operates within SMB customer segments

Jet2 Travel Tech – Pune (Feb’22 – Jan’25) - Head of Delivery - GCC Head

- ❖ Jet2TT is a GCC setup by Jet2.Com, the UK’s biggest Airline and Holiday company having revenue of over \$6.5 billion. Played a key role in establishing and scaling this India site (GCC) for a global enterprise, as part of the GCC leadership team.
- ❖ Responsible for an entire offshore portfolio worth £4.4 million
- ❖ Reporting to the CIO, responsible for the entire delivery from India.
- ❖ As the Delivery Head for Jet2's India Development Center, the focus was on driving technological innovation in the travel domain, transforming the organization's technological capabilities and team structure while delivering significant business value
- ❖ Scaled the team from 70 to over 400 employees, developed a comprehensive team structure spanning multiple technology and business domains, recruited across diverse teams and skills, establishing the site's organization structure, hiring engine and talent strategy across functions
- ❖ Teams- Product Management, Business Analysts, Technical Architecture, E-Commerce, Business Applications, Mobile, Data Engineering, Data Analytics, Data Science & MLE, Power Platform, RPA, Middleware, IT services and L&D
- ❖ Hired over 20 engineering managers and two heads of delivery, 45+ roles across 20+ technology stacks, Recruited 60+ freshers over 3 years

- ❖ Developed a pyramid structure for team composition, implemented cross-skilling and upskilling programs, introduced skill assessment programs, restructured salary and levels to improve retention and optimize costs
- ❖ Transitioned ownership of 35+ applications to the India team, created a structured transition plan without compromising onshore relationships
- ❖ Led rewrite of 25+ legacy applications using modern technologies and methodologies, Achieved cloud-native application development
- ❖ Mobile and E-Commerce Innovations-Successfully migrated to a single, native mobile application, Decoupled mobile app from the e-commerce platform
- ❖ E-commerce projects- Gen AI-powered smart search, Migrated from Sitecore to Adobe CMS, Modernized booking platform, API optimizations
- ❖ Data and Analytics Advancements, Data Science-Transformed data science team from proof-of-concept stage to production, deployed 9 live data science models which generated over \$5 million in additional margins within 18 months
- ❖ Data Engineering- Executed major platform revamp, Migrated data infrastructure from on-premises to Google Cloud Platform (GCP) and Snowflake
- ❖ Operational Excellence Initiatives- Implemented revised code review processes, conducted comprehensive process audits, Developed delivery dashboards
- ❖ Introduced automation tools and Integrated GitHub Copilot, implemented code compliance tools to enhance productivity and efficiency
- ❖ Trained 310+ employees in Agile methodologies, Implemented Scrum framework, planned transition to scaled Agile framework
- ❖ Programming Languages: .NET, Python, Frontend Frameworks: Angular, Vue.js, React, Mobile Platforms: iOS, Android, Testing Tools: Selenium, Cucumber, Cloud Platforms: AWS, GCP, Data Platforms: Snowflake, Adobe, Analytics: Google Analytics, Infrastructure: Kubernetes, Kafka
- ❖ Reporting: SSRS, SSIS

Netrix Global – Pune (Nov'19 - Jan'22)- Head of Delivery - GCC Head

- ❖ Reporting to the Executive leadership team, responsible for the India operations and delivery, a team of 180 spread over Pune, Mumbai, Kochi, and Hyderabad
- ❖ Responsible for end-to-end Operations, Delivery, Stakeholder, Vendor, Partners, Sub-Con vendor management from India
- ❖ Responsible for cost-effective yet efficient 24/7 support to customers spread over the US and EMEA regions.
- ❖ The team works on software products offered by Netrix in the Telecom/Healthcare/Education domain, implemented in both on-premises and Cloud.
- ❖ The team also works on large managed services customers which include Infrastructure, traditional datacenter, databases, cloud migration, native development, analytics, end-to-end development, testing, deployment, and support to software solutions and applications across multiple domains using the latest technologies and practices.
- ❖ Took various initiatives to improve operational efficiency such as HR Processes, Salary Benchmarking, Job Level and Job Role matrix, Salary cost sustenance model, office operations, KPI dashboard, timesheet compliance, real estate management, Hiring and onboarding, changed vendors to create cost efficiency, worked with global leaders to bring in new work to India, employee engagement activities and focus on retention, etc.

Nuance India Pvt. Ltd – Pune (May'13 - July'19)- Director-Professional Services- India Center Head

- ❖ Managed a team of 120 working on multiple projects: customization, implementation and support for AI/ML-based conversational IVR and Virtual assistance applications on-premises and in Azure-based cloud.
- ❖ Leading UI Design, Speech Science, Grammar Dev, Appdev, QA, Tools support, Product Supp, Cloud (network infra, Devops, Sys Admin,), Virtual Assistance, BI, Content Management working on end-to-end lifecycle of Conversational IVR, Voice-Biometrics and Virtual Assistance Apps using the latest technologies and Nuance frameworks.
- ❖ Responsible for end-to-end delivery, quality, escalations, timelines of the projects staffed from offshore using Agile methodology
- ❖ Technologies used- Java, Webservices, Rest/Soap UI/Angular JS/ .Net/ C#/Android/iOS/Python/Puppet/Azure/Oracle BI and so on
- ❖ Responsible for staffing the projects, managing, and tracking the development activities using Agile methodologies on day-to-day basis
- ❖ Manage the tech support team to surpass the customer SLAs, track the tickets and take care of the customer escalations
- ❖ Delivered more than 100 projects without major escalations, all projects delivered well within the timelines
- ❖ Improved offshore adoption from few hundred hours to >150K hours within 2 years
- ❖ Steered efforts in attaining cost savings worth US\$ 450K in FY 2016-2017 by working on 15% of total funded hours
- ❖ Managed 2 global staff-Aug Sub-Con vendor engagement worth US\$ 750K annual billing
- ❖ Actively participated in Global Leadership Forums to create positive imprint of offshore impression and adoption
- ❖ Improved the business metrics through continuous process improvements, various automations, people development and robust delivery model
- ❖ Managed recruitment, training, development, staffing, performance management, people management, attrition management and motivated employees to ensure career progression and increasing efficiency through process enhancements
